DIAMOND COATING
Highly Adhesive

PATENTED

SCRAIL® ANCHOR

SCRAIL® ANCHOR

- Patented STEELTHREAD special thread ensures excellent holding power
- DIAMOND COATING for maximum holding power
- Also available in stainless steel A2 & A4 or with FASCOAT® finish

DIAMOND COATING

The expansion elements in the DIAMOND COATING diminish the friction between the fastener & the wood material. As a result of this reduced friction the fastener-destroys less wood fibers, allowing more contact surface which results in increased withdrawal values.

SCRAIL® ANCHOR − PERFECT FOR STRUCTURAL TIMBER CONSTRUCTION

SCRAIL® ANCHOR nail screw fasteners have been specially designed for swift, efficient timber connector fastening in structural timber construction. Compared to traditional loose anchor nails, these collated SCRAIL® ANCHOR nail screw fasteners boast an impressive 8-fold insertion speed increase. An additional benefit is their adjustability and complete removal capability, simplifying the dismantling of structures like carports and play towers. Additionally, they promote circular economy by facilitating quick removal, enabling easy separation of building materials at the end of their lifespan. We also provide stainless-quality SCRAIL® ANCHOR, ideal for outdoor applications.
